[6] Education & Research

[15] Number of sustainability community services project organized and/or involving students

This is an example of a sustainability related community project: Academicians of Environmental Engineering Department of Bursa Uludag University directed this project.

The target group was children of the employees working at several industries in the city of Bursa. The children were educated on environmental issues such as climate change, circular economy, etc. They learned how to apply basic environmental steps at their homes and proved their changing behaviors. The children prepared and submitted their own videos on environmental behaviors at their homes at the end of the project. These pictures and news about the success of the project were published at the local newspapers of Bursa.

1. Example to sustainability community services project organized and/or involving students:
Education of the children of the employees from industries in Bursa to change their environmental behaviors at home: Academicians of the university and student members of the environmental society of the university were in charge of monitoring the reports by the children on their activities at home. Children received certificates for successfully finishing the project. Twenty children registered for the project, and also their families participated in several sections of the project. Approximately 100 people were reached during the project course.

2-Example to sustainability community services project organized and/or involving students:

Preparation of Marine Pollution Action Plan and Focusing on Marine Pollution: The project lasted three years. The activities were organized by Bursa Uludag University (BUU) and Bursa Metropolitan Municipality. Academicians of the Environmental Engineering Department of BUU and student members of the Environmental Society and Underwater Society of BUU were involved in the project. The above pictures belong to the waste cleaning activity at one of the seashores of Bursa city. The public attended the activity. Solid wastes were cleaned from the beach and from the underwater by the diver students of the university. The activity largely appeared in the local press.

3-Example to sustainability community services project organized and/or involving students:

Ecological Gardens Project: Bursa Uludag University separated some of its arable fields for students and staff to grow plants and vegetables. One hundred twelve gardens were established in the scope of the project.

4-Example to sustainability community services project organized and/or involving students
National Environmental Congress: Every year, the Environmental Society student members organize a nationwide environmental congress, where hot environmental topics are discussed. The picture belongs to one of the previous congresses.

5- Example to sustainability community services project organized and/or involving students
Healthy Cities Profile Study: Bursa Uludag University is actively involved in sustainable community projects. Academicians from Environmental Engineering Department support the healthy cities project of Bursa Uludag University and efforts by Bursa Metropolitan Municipality towards this aim. The healthy cities profile, which collects all the environmental and health data for the city of Bursa, is prepared by Bursa Uludag University academicians. The profile also indicates the environmental hot points that should

6- Example to sustainability community services project organized and/or involving students
Districts of Bursa are Determining Environmental Problems Project: This project is run by Bursa Uludağ University and Bursa Metropolitan Municipality. Many workshops were organized involving communities from the districts of Bursa city to determine the environmental problems they encountered and generate solution recommendations. More than 700 people from the public were actively involved in the project.

7- Example to sustainability community services project organized and/or involving students
A journey with our wastes: Bursa Uludag University and Bursa Metropolitan Municipality collectively run this project. Sixty students (secondary education level) participated in the project. The aim was active learning in environmental education. The academicians of the Environmental Engineering Department and Psychological Counseling and Guidance Department of Bursa Uludag University directed the environmental activities such as composting, water treatment, microbiological monitoring, etc., performed at laboratory scale. Technical trips, workshops, and seminars enriched the educational active learning period in the project.

Project name	Participants	Project duration	Project area
Hand-in-hand with children for a clean industry (Figure 1)	100	Three months	Turkey, Bursa
Marine Pollution Action Plan (Figure 2)	200	Three years	Turkey, Bursa
Ecological Gardens (Figure 3)	500	No time limit	Turkey, Bursa
National Environmental Congress (Figure 4)	300	Five days per year	Turkey
Healthy City Activities, Healthy City Profile Preparation (Figure 5)	500	No time limit	Turkey
Districts of Bursa are Determining Environmental Problems (Figure 6)	700	Two years	Turkey, Bursa
A journey with our wastes (Figure 7)	60	Two years	Turkey, Bursa
